Summary

Experienced Mobile and Web App Developer specializing in designing, developing, and maintaining high-quality applications for Web, iOS and Android platforms. Proven expertise in integrating complex APIs to deliver seamless, user-friendly B2B solutions, including digitizing operational processes and enhancing user experiences. A quick learner with a strong background in Flutter, python, Angular and native mobile development, seeking to contribute to innovative solutions.

Education

Moringa School - Software Engineering	Jan 2019 – Dec 2019
Mount Kenya University - Diploma in Information Communication Technology	Jan 2013 – Dec 2016

Experience

Senior Software Engineer, Kiambu County – Kiambu, Kenya May 2024 – present

- Developed a mobile and web application for land registration and management, digitizing operational processes.
- Integrated advanced geospatial tools and payment systems, boosting revenue collection by 40% and accelerating application processing times.
- Designed robust multi-step forms with secure document uploads and validation, ensuring compliance and error-free submissions.
- Engineered end-to-end workflows for land transfers and planning processes, including automated invoicing and real-time tracking.

Senior Software Engineer, Bexley Limited – Nairobi, Kenya April 2023 – Mar 2024

- Worked as a fullstack engineer to build a loans and savings application called Elevate.
- We worked on end to end workflows to automate and fasten the loan processing process for suppliers.

Senior Software Engineer, Bexley Limited – Nairobi, Kenya Mar 2022 – April 2023

- Contributed to the development of Fundi254, a service delivery application for Catholic Relief Services (CRS), connecting informal sector workers to on-demand jobs.
- Collaborated with a team of developers to create a robust and user-friendly platform.

Senior Software Engineer, Qinsley LTD – Nairobi, Kenya Jan 2020 – Jan 2024

- Connected front-end to back-end systems through seamless integration of APIs.
- Translated complex designs into intuitive and engaging UI experiences for various applications.
- Collaborated with senior developers on large, complex design projects, ensuring successful delivery.

Lead Software Engineer, Hukie Technologies Limited – Nairobi, Kenya Jan 2021 – May 2022

- Developed and supervised the creation of a fully functional Android/iOS application, leading a team of three developers.
- Enhanced API functionality for the company, improving system integration and performance.
- Integrated AdMob SDK for banner, video, and interstitial ads, optimizing user engagement and revenue.
- Performed comprehensive Linguistic, Cosmetic, and Functional tests to ensure high-quality application delivery.

Skills

Mobile and Web Development: Flutter, Android Development, iOS Development, AdMob SDK, Mobile Development, UI/UX Design Principles, Angular, Python(Django & Flask)

API Integration & Backend: API Integration, Payment Integrations, Real-time Tracking, Automated Invoicing,

Tools & Technologies: Geospatial Tools, Map Integration, Form Management, Document Management, Multi-Step Registration, Advanced Land Search, Access Control, Workflows, CRM Systems, Linux Server, Virtualized Environments, Web Development, Computer Networking, PC Hardware Maintenance, Troubleshooting

Quality Assurance: Linguistic Testing, Cosmetic Testing, Functional Testing

Soft Skills: Team Collaboration, Problem Solving, Project Management, Consulting, Supervision

Languages: English (Professional Working), Swahili (Professional Working)
